PROFESSIONAL SUMMARY

Senior mobile developer with 10+ years of experience delivering cross-platform apps in native Android and Flutter apps in Kotlin and Jetpack Compose. Strong in Clean Architecture, state management, MVVM and MVI, REST API integration, Firebase, payment gateways, video calling and live streaming. Has built apps in healthcare, payments, live streaming and ride-hailing. Experienced in Agile/Scrum teams, code reviews, mentoring, automated testing and performance optimization.

TECHNICAL SKILLS

Languages: Dart, Kotlin, Java

Android: Android SDK, Jetpack Compose, Android Jetpack, Coroutines, Flow, StateFlow, WorkManager, Material Design

Cross-Platform: Flutter (Android, iOS, Windows), State Management, Clean Architecture

Architecture: Clean Architecture, MVVM, MVI, MVC

Libraries: Firebase, Hilt / Dagger 2, Retrofit, Room, ExoPlayer / Media3, FFmpeg

Media & Streaming: Video playback, video streaming, live streaming, adaptive streaming

Integrations: REST APIs, payment gateways, Twilio, Agora SDK, Google Maps, Firebase Cloud Messaging, Gimbal notifications

Data: SQLite, SQL, Room

Testing & Quality: JUnit, Espresso, automated testing, Crashlytics, Google Analytics

Tools: Git, GitHub, Bitbucket, GitLab, JIRA, CI/CD, Android Studio

AI-Assisted Development: GitHub Copilot, Claude: code generation, refactoring, debugging, documentation, test generation

PROFESSIONAL EXPERIENCE

Sr. Android / Flutter Developer
Jun 2021 – Aug 2026
Saince Software Pvt. Ltd, Hyderabad

- Built cross-platform mobile applications for Android and iOS using Flutter.
- Designed, developed and maintained Android applications in Kotlin and Java using MVVM architecture.
- Integrated RESTful APIs, payment gateways, video calling and third-party SDKs.
- Re-engineered rendering and background-processing pipelines, contributing to reported improvements of 70% in application performance and a 60% reduction in crashes across flagship products.
- Worked with product managers, designers and backend teams in an Agile environment.

Sr. Android Developer
Mar 2019 – Jun 2021
Byteridge Software Services Pvt. Ltd, Hyderabad

- Contributed as an Android Developer with Microsoft on the Blentnet project, delivering mobile features over a one-year engagement.
- Lead Android application development and delivery for enterprise mobile applications.
- Implemented dependency injection with Dagger 2 and local persistence with Room.
- Integrated Firebase services including analytics, notifications and crash reporting.
- Conducted code reviews and mentored junior developers.

Sr. Android Developer
Mar 2018 – Mar 2019
LSN Software Services Pvt. Ltd, Hyderabad

- Developed the Blizdpad native Android application using Java, enabling local Wi-Fi connectivity and communication within the application ecosystem.
- Implemented project discovery and retrieval features, allowing users to browse and download available projects from a connected store over the local network.
- Built project ordering workflows that enabled users to select projects and place orders directly through the mobile application.

Android Developer Feb 2016 – Mar 2018
InventBird Pvt. Ltd, Hyderabad

- Developed a native Android cab-booking application using Java, integrating Google Maps and location services for pickup, drop-off, and ride tracking.
- Integrated Firebase Cloud Messaging to deliver booking confirmations, ride-status updates, and notifications to drivers and customers.
- Implemented map-based ride-booking functionality to support location-aware interactions between riders and drivers.

Jr. Android Developer Aug 2015 – Jan 2016
Confianza Technologies, Hyderabad

KEY PROJECTS

- **SainceTrade (Healthcare):** Pharmacy ordering platform with medicine search, inventory-based cart management and OTP authentication with token-based security. Flutter, Clean Architecture, state management, SQL database.
- **U-ROCK:** Cross-platform application for Windows, Android and iOS built with Flutter, maximizing code reuse and reducing platform-specific effort.
- **Doc-U-Scribe (Healthcare):** Clinical documentation platform with speech dictation. Jetpack Compose, MVI, Clean Architecture, state management, SQL database, data encryption with RN Encryptor.
- **Qural (EMR System, Healthcare):** Android and web Electronic Medical Records solution. Kotlin, MVVM, Firebase, QR code scanning, REST APIs.
- **Weedeo (Live Streaming):** Real-time video streaming using Agora SDK and FFmpeg.
- **Prydo Rider & Driver:** Ride-hailing application with multi-language support, Google Maps, payments and calling.
- **Smiley Serve:** Subscription-based e-commerce mobile application with Google services integration.

EDUCATION

MCA – Pydah College of Engineering and Technology, Visakhapatnam, India 2011 – 2014
